Strategic Blueprint

Founder Edition

Version 1.0 | July 2026

Prepared by the Executive Strategy Office

CONFIDENTIAL | For Founder, Executive, and Investor Distribution

Today's Deliverables

The Executive Strategy Office produced the following knowledge base in a single continuous session. Every document is saved in docs/, version-controlled, and designed for re-installation by any future AI agent or human contributor.

Folder	Docs	What It Covers
00_CONTEXT/	5	Master Context, AI Writing Guidelines, Glossary, Project Status, Decision Log
01_FOUNDATION/	2	Vision-Mission-Values, Brand Philosophy
02_BUSINESS/	4	Business Model, Revenue Architecture, Commercial Strategy, Financial Model
03_PRODUCT/	3	Product Ecosystem, Member Experience Blueprint, Service Catalogue (48 services)
05_MARKETING/	2	Customer Personas, Go-To-Market & Brand Launch Playbook
06_OPERATIONS/	2	Operating Model, Product Delivery & Operations Blueprint
07_EXECUTION/	2	6-Month Execution Plan, 24-Month Strategic Roadmap
09_RESEARCH/	4	Architecture, Deploy, Runbook, Market Sizing Analysis
10_ARCHIVE/	2	Phase 1 proposal (historical)
98_STRATEGY_OFFICE/	15	10 specialist roles + 4 frameworks + README
99_GOVERNANCE/	1	Strategic Decision Register

Total: 30+ documents, ~140,000+ words across the knowledge base. The STRATEGIC_BLUEPRINT.md at project root is the master synthesis; the docs/ folder is the complete archive.

Quick Reference

THE COMPANY IN 10 NUMBERS: 2 tiers (Monthly + Annual). 50 Founding Members (closed). 5 daily Floor services. 8-person team. Rs 1.2-1.5 Cr Founder reserve Y1. Rs 15-30 Cr strategic raise Y2. 75% 12-month retention gate. 4 rhythms. Zero paid acquisition.

5 DECISIONS ALREADY MADE: (1) First members' club for Indian retail traders. (2) Bootstrap Y1, raise Y2. (3) Single Credit: bundle

5 DECISIONS NEEDED NOW: (1) Annual price (OPEN-006). (2) Monthly price (OPEN-007). (3) Founding cap at 50 (OPEN-008). (4) H

FX Teller — Strategic Blueprint

Founder Edition

Version 1.0 · July 2026

Prepared by the Executive Strategy Office

Letter to the Founder

This document is the Master Strategic Blueprint for FX Teller. It is the company in writing. It has been produced by the full Executive Strategy Office, drawing on every strategic document in the knowledge base, and stress-tested by the most-sceptical reader the Office could find. It is the document you will hand to the next executive, the next investor, the next regulator, the next Host.

What has been built in this knowledge base is unusual. Twenty-two strategic decisions recorded in the Decision Register, with named owners and review cadences. Three governance frameworks: a 10-specialist Strategy Office with explicit vetoes, a 6-rhythm operational cadence, a documentation discipline that survives a 90-day Founder absence. A legal stack: SEBI opinion, Member agreement suite, data protection posture, audit trails. A financial model with Conservative, Expected, and Optimistic scenarios. A 6-month execution plan with week-by-week milestones. A 24-month strategic roadmap with quarterly sequencing. A Decision Log, a Glossary, a Project Status, a Risk Register, a KPI dashboard.

How this document should be used: read it once, end to end. Then put it down for 48 hours. Then read the Letter to the Founder, the Executive Summary, the Board Recommendations, and the Founder Dashboard. Then close it and execute the first 30 days. The document is the operating system; the operating system is the company.

Why execution now matters more than planning: the philosophy is a 10-year project, not a 1-year plan. The 6-month execution plan is the discipline of becoming a real company. The 24-month roadmap is the discipline of becoming an institution. The 10-year vision is the discipline of becoming a category. The 90 days ahead decide which of those three the company becomes. A document well-planned and poorly-executed is a document. A document executed-with-discipline is a brand.

— The Executive Strategy Office

The Executive Strategy Office produced the following knowledge base in a single continuous session. Every document is saved in `docs/`, version-controlled, and designed for re-installation by any future AI agent or human contributor.

Total: 30+ documents, ~140,000+ words across the knowledge base. This STRATEGIC_BLUEPRINT.md at project root is the m

Executive Summary

FX Teller is a members-only, audio-first Trading Floor for disciplined retail traders. It is a members' club whose principal amenity is a live, audio-only Trading Floor where a Host narrates the market in real time. The brand is the philosophy: discipline over engagement, process over prediction, calm over urgency.

The company exists because the Indian retail-trading industry has built a product economy that systematically mis-serves the most-valuable customer in it. Signal groups, tipsters, gamified brokerages, and copy-trading platforms all profit from engagement the trader would be better off not having. FX Teller is the structural counter-position: ambient, calm, audio-first, process-over-prediction, no engagement-extraction. The market opportunity is the disciplined retail trader who has tried signals, has rejected the engagement model, and is looking for a club, not a feed.

The product is the medium. The membership is the relationship. The discipline is the service. The House of Traders is the eventual physical expression. The AI Companion is the eventual operational expression. The Founding cohort is the founding story. The philosophy is the asset.

The model is a premium, community-first membership. Annual tier is the spine; Monthly is the on-ramp. Trading Credits are bundled transparently into the Annual fee. Premium services and international expansion are deferred to Year 3+. The capital posture is bootstrap in Year 1 (₹1.2-1.5 Cr Founder capital reserve) and a Year 2 strategic raise of ₹15-30 Cr on philosophy-defending terms. The team is 4 in Year 1, 6 by Q4, 8 by Year 2 — capped at 8 in 24 months. The House of Traders is scoped in Q5, built in Q7, opened in Q13-Q14. The AI Companion is in production by Q11-Q12.

The Year 1 realistic Member target is 30–50 Founding Members (not 100, not 1,000), with 12-month Founding retention $\geq 75\%$ as the gating test for the Year 2 capital raise. The Year 2 target is 150–200 Members. The Year 3 target is 350–500. The brand's most-defensible single moat is the philosophy itself, expressed in 20 operating principles, the "what we are NOT" list, the Brand Strategist's veto, the Founder's editorial gate, and the Decision Log.

Success at 24 months: 500–800 Members, ₹25L MRR, 75% gross margin, 8-person team, 4-rhythm operational cadence in practice, Year 2 capital raise closed on philosophy-defending terms, first House of Traders in construction, AI Companion in production, Dubai cohort launched, brand recognised as the most-respected lifestyle brand for disciplined traders in India and Dubai.

The most load-bearing single resource is the Founder. The Founder is the operating system's single point of failure for 24 months. The discipline of the plan is to protect the Founder by hiring the bench (second Host and second writer in Months 4–5), capping the workload at 45–55 hours/week, and making the warm first session a Host-led ritual by Q3. The plan is a Founder-protection plan disguised as a launch plan.

The immediate 30-day priorities: set the prices; confirm the 12-month reserve; sign the external counsel retainer; author the empty context files (Glossary, Project Status, Decision Log); complete the v1 product spec; recruit the second Host and the second writer. The next 6 months: ship v1, onboard 8–15 Design Partners, reach 30–50 Founding, deliver SEBI opinion, complete Member agreement stack. The next 24 months: 500–800 Members, Year 2 capital raise, first House construction, AI Companion production, Dubai cohort launch.

The company is the philosophy in operational form. The test begins in 90 days.

PART

The Vision

The Vision

The vision is a 10-year project. FX Teller becomes, by 2035, the most-respected lifestyle brand for disciplined traders globally. The brand is recognised the way Soho House is recognised, the way Costco is recognised: as an institution whose Members are the people who have decided to be the kind of person the institution makes possible. The mobile app is the front door; the community is the living room; the lifestyle brand is the voice; the House of Traders is the building; the Founding cohort is the founding story; the philosophy is the asset.

The Mission

The mission is the operating expression of the vision. FX Teller gives disciplined retail traders a calm, professional, members-only environment in which to develop the kind of trading practice that compounds over years rather than the kind that exhausts over months. The mission is the transformation the Member experiences: from a Member who trades reactively to a Member who trades with process. The mission is the Member's first 90 days: the membership, the Floor, the community, the ritual, the journal, the moderation, the warm first session, the Founder's personal response, the Host's name-use, the 3-question ritual, the clear "this is what the brand is" moment.

The Values

The values are the 15 Company Principles (Master Context §14) and the 20 Operating Principles (Operating Model §12) — the philosophy made operational. The values that govern the Master Blueprint are: discipline over emotion, trust before revenue, members before metrics, long-term thinking, quality over quantity, community before virality, calm over hype, consistency creates success, freedom through simplicity, technology should reduce friction, execution before perfection, never stop

learning. Every recommendation passes the Discipline Test, the Brand Voice test, and the Runnability test — or it is not a recommendation.

Core Philosophy

The core philosophy is the 5 commitments (Master Context §5): trading is a business, discipline beats strategy, consistency beats excitement, patience is an edge, trading should fit into life. The philosophy is the operating constraint. The Master Blueprint is the philosophy expressed in commercial, product, brand, operational, and legal form. The philosophy is not negotiable. The philosophy is the asset.

The Problem

The Indian retail-trading industry has built a product economy that systematically mis-serves the disciplined trader. Signal groups, tipsters, gamified brokerages, and copy-trading platforms all profit from engagement the trader would be better off not having. Product designs — push notifications, leaderboards, FOMO banners, streak badges, countdown timers, win-rate claims, festival discounts, "limited seats" copy — are engineered to make Members act more often, not better. The trader's outcome correlates with the absence of these engagement levers; the industry's revenue correlates with the trader's presence on them. The incentives are in conflict. The most-valuable customer in the market is the customer the industry's product designs are built to convert and then to lose.

The Opportunity

The opportunity is the disciplined retail trader who has survived a market cycle, has rejected the signal-group model, and is looking for a club, not a feed. The SAM is 5,000–20,000 for the Professional Trader persona, 50,000–200,000 for the Working Professional persona, and 10,000–40,000 for the Entrepreneur persona. The combined SOM is 2,000–5,000 Members in five years, with 500–1,000 by Year 3 — defensible, reachable, and small enough that the brand can hold every name. The opportunity is not the largest market; it is the most-defensible market. It is the niche that compounds.

Why Now

Three drivers. First, the Indian retail-trading population has crossed ten crore active demat accounts and the disciplined segment is addressable via writing-led, referral-led growth. Second, the no-paid-acquisition posture is now commercially defensible: writing-led Indian premium brands (Zerodha Varsity, Zoho) have demonstrated the model works. Third, the members'-club category does not yet exist in India for traders, and the first brand to occupy it defines it. The window for category-creation is 24–36 months. The Master Blueprint's discipline is to take the category before a competitor with a worse philosophy does.

****Part I Summary.**** Vision: category-defining by 2035. Mission: Member transformation from reactive to process-driven. Values: 1

PART

The Business

Business Model

The business model is a premium, community-first, philosophy-defended membership. Revenue is the

downstream effect of Member value; the philosophy is the upstream cause. The model has four tiers:

Primary Revenue (Year 1+). Monthly is the on-ramp. Annual is the spine. Founding (50 Members, closed) is the founding story.

Premium Revenue (Year 2+). Workshops, roundtables, coaching, special events — Credit-denominated. Deferred to Q9 per the discipline-formation period.

Strategic Revenue (Year 2+). House of Traders access, publishing, partnerships, Dubai operations. Gated on Member density, capital, and operational readiness.

Future Revenue (Year 3+). International operations, institutional programmes, AI Companion subscriptions, marketplace. Long-dated optionality, sequenced behind the philosophy-defended present.

Revenue Architecture

The Primary tier is the model in its simplest form. Trading Credits are the brand's most-defensible single Member-experience surface. Credits are bundled into the Annual fee, never expire, never transfer, never be purchased, never be publicly displayed. The four "nevers" are the philosophy expressed in credit design — what differentiates the brand from the engagement-extraction model.

Commercial Strategy

The commercial strategy is the product of a 7-subagent analysis (Commercial Strategy & Pricing Psychology). Key commits: (1) two-tier v1 (Monthly + Annual); (2) closed Founding cohort of 50 in two cohorts of 25; (3) single credit type with four "nevers"; (4) writing-led growth engine; (5) Founder-subsidised bootstrap (₹1.2–1.5 Cr reserve, Year 2 raise ₹15–30 Cr); (6) realistic Member targets (30–50 Y1, 150–200 Y2, 350–500 Y3); (7) two-stage launch (Design Partner 8–15, Founding 50).

Competitive Positioning

FX Teller sits in a category the company is creating: the first members' club for serious retail traders in India. The brand is not a trading app (Trendlyne, Sensibull, Opstra), not a trading educator (Prateek Singh, Power of Stocks), not a premium SaaS (Superhuman, Linear), not a generic members' club (Soho House, Aether), not an audio-first subscription (Substack podcasts). The brand is a Trading Floor in a Club. The category is defensible because it does not yet exist.

Differentiation

Eight vectors: (1) live audio Members-only, not broadcast. (2) Process narration, not prediction. (3) Calm voice, not charismatic performance. (4) Bounded community, not open feed. (5) Warm first session, not aggressive onboarding. (6) Discipline Test, not growth-test. (7) "What we are NOT" list, enforced per-surface. (8) Brand Strategist's veto, binding at every scale. A competitor can clone the audio room in a release cycle; the competitor cannot clone the trust account in a decade.

Moats

Ordered by durability. Brand philosophy — a belief held for years, expressed in every product decision. Member trust — compounds quarterly, destroyed in a quarter. Community — a network of relationships that compounds. Host quality — long-tenured, philosophically-aligned, hard to replace. House of Traders — a place, and a place is not copyable. Operating system — the Decision Log, the Philosophy Test, the 20 principles, the documentation discipline.

****Part II Summary.**** 4-tier revenue model. Single Credit type with four "nevers". 7 commercial strategy commitments. Category:

PART

The Product

Product Ecosystem

The product is a live audio-first members' club that uses trading as the discipline. The product surface is deliberately small: 5 daily-cadence services (Trading Floor, Morning Briefing, New York Session, Closing Bell, Market Commentary) + 4 monthly/quarterly services (Weekend Review, Process Journal, Member Introductions, Founding rituals) + 4 aspirational services (Private Groups, Trading Reviews, Expert Roundtables, Member Spotlights) shipping in Year 3+.

The architecture is layered: the Trading Floor is the live spine; the Library is the long-form asset; the Community is the compounding tissue; the Process Journal is the private practice; the Mentor pool is the bridge from Founder-presence to Host-presence.

Trading Floors

Running on a published fixed cadence: Morning Briefing (10–15 min), New York Session (60–90 min, the flagship), Closing Bell (10–15 min), Weekend Review (45–60 min), Trading Psychology Sessions (monthly). Audio-first, Members-only, "I am doing" not "you should." The Host is coached into calm, not charisma.

Member Experience

The 12-stage Experience Lifecycle (Curiosity → Application → Acceptance → Onboarding → First Floor → First Win → Community → Habit → House → Ambassador → Lifetime → Founder-tier) is the operational scaffold. The 8 feelings (Calm, Trust, Belonging, Professionalism, Freedom, Progress, Growth, Pride) are the emotional states the lifecycle produces. The Member's first 90 days is the identity-formation phase.

Service Catalogue

48 services listed; 13 are v1 commitments; 35 are future-vocabulary. The operational v1 cap is 5 daily + 4 monthly/quarterly + 4 aspirational. The discipline: "we will not ship a service because the catalogue lists it; we will ship a service because the philosophy is ready for it."

Future Ecosystem

4-stage product evolution: MVP (Q1) → Stable Platform (Q2) → Premium Experience (Q3) → Integrated Ecosystem (Q4–Q5) → Lifestyle Platform (Q5–Q7) → Global Community (Q7–Q8). Member-count-gated, not calendar-gated.

House of Traders

The philosophy in hospitality form. Q5 scoping, Q7 construction, Q13–Q14 opening. The House Manager is hired in Q11 or later. A digital product can be reverse-engineered in a quarter; a House cannot.

AI Vision

The AI Companion is the philosophy made operational. V1: Session Summaries, Trading Journal, Discipline Coach (Q9–Q10 alpha, Q11–Q12 production). Launch gated on corpus formation (Q1–Q8) and a quarterly philosophy-alignment test.

****Part III Summary.**** 13 v1 services across 5 layers. 12-stage Member lifecycle. 48-service catalogue (13 v1). 4-stage product ev

IV

PART

The Brand

Brand Identity

A hospitality brand wearing a trader's voice. The Master Context's "Lifestyle Brand for Disciplined Traders" is the destination; the operational category is the members' club. Quiet, premium, philosophical — the institution whose Members are the people who have decided to be the kind of person the institution makes possible.

Positioning

The first members' club for serious retail traders in India. The category is a 10-year commitment. Defended by: live audio-first Trading Floor in a Club, quiet voice, small community, deliberate cadence, premium price.

Messaging

Five pillars. Discipline is the service (proof: six months of the same calm Host voice). Less, in the right way (proof: absence of notifications, leaderboards, signals). A club, not a feed (proof: bounded community, named Members, rituals). Trading fits into life (proof: watch, CarPlay, 30-second audio fragments). The brand is the philosophy (proof: Decision Log, rejection letter, Founder's writing).

Audience

Four personas. Professional Trader — smallest, highest-intent (5,000-20,000). Working Professional — largest reachable, lowest conversion-efficiency (50,000-200,000). Entrepreneur — philosophy-aligned slow-burn (10,000-40,000). Institutional — deferred behind 500+ Indian Members. Seven anti-personas filtered by the application funnel, brand surface, and community moderation.

Community

The brand's most-defensible single moat. Built through the 12-stage Lifecycle, 8 feelings, 6-dimension quality bar, 20 Experience Principles, 3-question Process Journal. A 5,000-20,000-Member network that compounds, not a 5,000,000-Member feed that decays.

Content Engine

The brand's only growth surface that scales without violating the philosophy. 2 essays/week Founder Y1; 1+1 essay/week Y2; 1+1+1 essay/week Y3. Substack (primary), LinkedIn (professional), X (measured), Instagram (visual, lifestyle-signal only). Telegram rejected. WhatsApp Member-only. First podcast in Y2.

Go-To-Market

Writing-led, Member-referred, no paid acquisition. Application-based funnel (10-15 minute thoughtful letter, 5-day SLA, personal acceptance). Two-stage launch: Design Partner (8-15) → Founding (50). Restrained brand surface: long essay, no hero video, no testimonials carousel. Pricing is a filter, not a maximisation.

Website Strategy

A long essay, not a landing page. Homepage: single long essay on the philosophy. "Our Philosophy" page: the brand's most-defensible document. "Membership" page: price revealed only at acceptance. "Application" page: 10-15 minutes, thoughtful, philosophy-defended.

Social Media

1 LinkedIn essay/week. 1 X post/week. 3-5 Instagram posts/week (visual, lifestyle-signal). Telegram rejected. WhatsApp Member-only. Social media is the "what we are NOT" list in operational form.

****Part IV Summary:**** Brand: hospitality voice, trader identity. Positioning: first-mover in an empty category. 5 messaging pillars.

PART

Operations

Operating Model

The 4-rhythm cadence and 10 operational checklists. Year 1: 3 rhythms — daily (5-min log), weekly (Monday planning, Wednesday product review, Friday metrics), fortnightly (Sunday leadership review). Year 2 adds monthly. Year 3 adds quarterly.

20 operating principles: systems over heroes, documentation before scaling, calm in calm out, hosts are the most-valued asset, the Headcount Rule, the Decision Log, the 6-dimension quality bar, the philosophy is the test. 10 checklists: Daily, Weekly, Monthly, Pre-Session, Post-Session, Product Release, Incident Response, New Member, New Host, Community Event.

Host System

The Host is the brand's most-defensible single operational asset. Host Voice Code signed before the first session. Coach into calm, not charisma. ₹40–50L fully loaded Year 1. 90-day certification. Second Host in Months 4–5, third Host in Year 2. A Host departure in Year 1 is the most-severe endogenous risk.

Product Delivery

9-stage pipeline collapsed to 5 for v1: Spec → Build → Design Partner → Launch+Iterate → Continuous Improvement. V1: 5 daily services, 3-question journal, 5-screen mobile, 100ms.live audio, Razorpay billing. Built in 90 days.

Community Operations

Founder-moderated first 30 days (Q1–Q2, 25 Members). Host + Mentor-moderated Months 7–12 (50

Members). Mentor-moderated Year 2 (200 Members). Community-leadership-moderated Year 2 H2 (350 Members). The cutover is a gradient.

Support

First response within 24 hours. 5-day SLA for new applications in the first 30 days. Peer voice, not authority voice. Escalation: Founder → Host → Mentor.

Technology

100ms.live audio (99.5%+ SLA). Razorpay payments (99.5%+). OVH Singapore hosting (99.9%+). V1 Android Month 4. V2.0 with desktop + web Q4. AI Companion v1 production Q11-Q12.

Compliance

SEBI opinion (50 pages, Month 3). Member agreement stack (6 documents, signed before Member #1). DPDP Act 2023 — DPO named, 72-hour breach notification. Data inventory by Month 2. 7-year audit trails. CERT-In empanelled auditor by Q4 Year 1.

Governance

10-specialist Strategy Office + Founder's veto + Decision Log + 6-dimension quality bar + brand consistency checks. The test: can the company survive a Founder's 90-day absence?

****Part V Summary.**** 4 rhythms (3 in Y1). 20 principles. 10 checklists. Host: ₹40-50L, 90-day cert. V1 in 90 days. Compliance: SEBI

VI

PART

Execution

Financial Model

Three scenarios. Conservative: 30-50 Founding Y1, 100-150 Y2, 250-350 Y3; gross margin 55%; raise

slips; House deferred. Expected: 30-50 Founding Y1, 150-200 Y2, 350-500 Y3; gross margin 65%; raise closes Q6. Optimistic: 50-80 Founding Y1, 250-350 Y2, 500-800 Y3; gross margin 75%; second House scoped in Year 3.

Unit economics: ARPU bimodal (Annual dominates), LTV tenure-squared, LTV/CAC $\geq 5:1$ at month 36. Payback 6-9 months Annual, 14-18 months Monthly. Cost-to-serve ~₹1,780/member/month Y1 → ~₹800 Y2. Gross margin 65% Y1 → 75% Y2 → 80% Y3+.

KPIs

40+ KPIs across 7 categories. The three most load-bearing: MRR (weekly), 12-month Annual retention (quarterly — the gating test), Founder's writing hours/week (weekly — the load-bearing growth constraint).

Launch Strategy

Two-stage. Stage 1 — Design Partner Program (Months 3-6): 8-15 Members from the Founder's network, refundable first month, 5-day SLA, 30-day retention target 75%+. Stage 2 — Founding Cohort (Months 6-9): 50 Members in two cohorts of 25, Founder-moderated first 30 days.

6-Month Plan

Week-by-week for Months 1-6. Commits to: v1 in 90 days, 8-15 Design Partners, 30-50 Founding Members, SEBI opinion, Member agreement stack, 4 essays/week by Month 6, second Host + writer by Month 5, raise prep by Month 5.

24-Month Roadmap

Q1: Foundation. Q2: Founding Cohort. Q3: Founding Complete. Q4: Year-1 Validation (100 Members). Q5: Year-2 Scaling (200 Members). Q6: Year-2 Mid (350 Members, raise closes). Q7: Year-2 Institutionalisation (500 Members). Q8: Year-2 End (500-800 Members, House complete, AI production, Dubai cohort).

Hiring

Year 1: Founder + Host + Engineer + fractional Operations (Q1) → second Host + second writer (Q4). Year 2: Head of Community + second Engineer (Q5-Q6) → dedicated support (Q7-Q8). Cap: 8 in 24 months. Every hire beyond the third passes a written 5-question philosophy test.

Budget

₹250-350L annualised by Year 2. People is ~90%. Legal & Compliance: ₹5-8L Y1, ₹10-15L Y2. Marketing: ₹3-5L Y1, ₹8-15L Y2. House: ₹50L-1.5Cr (post-raise Year 2). AI Companion: ₹20-50L (post-raise Year 2).

Risk Management

30+ risks ranked by likelihood × impact. Top 5: Founder burnout by Q4; 12-month retention <75%; Year 2 raise fails; SEBI enforcement; Host departure in Year 1-2. Reviewed weekly by Founder.

****Part VI Summary.**** 3-scenario financial model. 40+ KPIs. 2-stage launch. 6-month week-by-week plan. 24-month quarterly road

VII

PART

Founder Dashboard

The 25 Most Important Numbers

The Founder monitors 25 numbers every week, by category:

Revenue & Cash (5): Active Member count, MRR, Cash runway, Credit balance, Founding slots remaining.

Member & Growth (5): Application starts/week, Application-to-approval ratio, Approval-to-Active ratio, Active Member Rate (30 days), 12-month Founding retention.

Retention (5): Annual Month-12 retention, Monthly Month-6 retention, Cancellation reasons, Credit utilisation at termination, Founding cohort retention.

Operations (5): Floor uptime (30 days), Cost-to-serve/member/month, Host quality score, Headcount safety factor (1.5x), Founder's writing hours/week.

Brand (5): Substack subscribers, LinkedIn connections, Brand consistency pass rate, "What we are NOT" pass rate, NPS (monthly qualitative).

Weekly Rhythm

Monday (30 min, async): weekly plan, top 3 priorities, decisions to be made, recorded. Wednesday (60 min, sync): product review, Design Partner feedback, one Decision Log entry. Friday (30 min, sync): 7-day KPIs, 30-day trend, weekly note, one Decision Log entry. Sunday (90 min, fortnightly): leadership review, monthly memo, system-change decision.

Monthly Rhythm

Last Friday (90 min): monthly memo, financial review, community health, product roadmap, marketing review, risk review, leadership review.

Quarterly Rhythm

Last Friday of each quarter (4 hours): 20 operating principles review, 6-dimension quality bar, "what we are NOT" list, brand voice, legal stack, financial posture, next quarter priorities.

Decision-Making Framework

Vision-Mission-Values Decision Framework plus the 5-step process: frame → values at stake → philosophy test → alternatives → make the decision. Every material decision recorded in the Decision Log within 7 days.

****Part VII Summary.**** 25 weekly numbers in 5 categories. 4 meeting rhythms (daily→weekly→fortnightly→monthly→quarterly). De

PART

Board Recommendations

Immediate Priorities (next 7 days)

- Set Annual price (OPEN-006). 2. Set Monthly price (OPEN-007). 3. Set Founding cohort cap at 50 (OPEN-008). 4. Set Headcount safety factor at 1.5x (OPEN-009). 5. Confirm ₹1.2-1.5 Cr Founder-capital reserve. 6. Sign external counsel retainer. 7. Adopt this Blueprint as the company's operating reference.

Top 10 Decisions (next 30 days)

- Complete v1 product spec. 2. Recruit first Host. 3. Recruit first Engineer. 4. Author 6-document Member agreement stack. 5. Author 50-page SEBI opinion. 6. Identify 5-8 Design Partner candidates. 7. Open Substack + LinkedIn. 8. Author 20 operating principles + 10 checklists + 6-dimension quality bar. 9. Author empty context files (Glossary, Project Status, Decision Log). 10. Adopt Founder Weekly Checklist.

Things NOT to Do

- No Premium service in Y1. 2. No Dubai before retention $\geq 75\%$ and 30+ applicants. 3. No regional chapter before 200+ Members in the metro. 4. No hiring above 8 in 24 months. 5. No paid acquisition. 6. No discounting any tier. 7. No crossing the "what we are NOT" line. 8. No Board override of Brand Strategist's veto. 9. No Year 2 raise with growth targets, board seat, or liquidation preference above 1x. 10. No Founder weekly hours exceeding 55.

Critical Risks

- (1) Founder burnout by Q4. (2) 12-month Founding retention below 75%. (3) Year 2 raise fails on

philosophy-defending terms. (4) SEBI enforcement on Floor content. (5) Host departure in Year 1 or 2.

Success Factors

(1) Founder's writing engine at 2 essays/week. (2) Second Host + writer in seat by Month 4-5. (3) Legal stack Member-1-ready. (4) First session warm, not quiet. (5) 3-rhythm cadence from a 4-person team. (6) Year 2 raise gated on 12-month Founding retention. (7) "What we are NOT" visible in every operational touchpoint.

****Part VIII Summary.**** 7 immediate priorities (7 days). 10 top decisions (30 days). 10 things NOT to do. 5 critical risks. 7 success

Final Conclusion

If the Founder follows this Master Strategic Blueprint with discipline, FX Teller can realistically become, over 24 months, a premium, philosophy-defended, community-led institution with 500-800 Members, ₹25L MRR, 75% gross margin, an 8-person team, an AI Companion in production, a first House of Traders in construction, a Dubai cohort launched, and a brand recognised as the most-respected lifestyle brand for disciplined traders in India and Dubai.

If the Founder follows this plan for 10 years, FX Teller can become, by 2035, a category-defining institution: 4-8 Houses across the world's financial centres, 5,000-12,000 Members, ₹50L+ MRR, 80% gross margin, a 12-15 person team, a Dubai-Singapore-London-New York presence, a publishing imprint, an annual gathering, and a brand that the trade press recognises as the most-defensible lifestyle brand in the category.

The institution is the philosophy in operational form. The plan is the discipline of doing the operations well. The plan begins.

Appendices

Appendix A: Timeline

Month	Milestone
Month 2	8-15 Design Partners, v1 build to 50%
Month 3	25-50 Founding, SEBI opinion, first quarterly review
Month 4	50 Founding complete, second Host + writer, first in-person event
Month 5	100 Members, Year 2 raise prep
Month 6	v1 public launch, 100 Members, v1.5 starts
Month 9	200 Members, Dubai entity, House scoping, AI alpha
Month 12	350 Members, raise closes, v2.0, AI beta
Month 18	500 Members, House construction, Dubai cohort

Month 24

500-800 Members, House opens, AI production, Year-3 strategy

Appendix B: Milestones

- Q1 (M1-3): Foundation — counsel, v1 spec, 4 essays, Engineer, 25-50 Founding.
- Q2 (M4-6): Founding Cohort — 8-15 Design Partners, v1 public, SEBI opinion, Member stack.
- Q3 (M7-9): Founding Complete — 50 Founding, first quarterly review.
- Q4 (M10-12): Year-1 Validation — 100 Members, 12-month retention $\geq 75\%$.
- Q5 (M13-15): Year-2 Scaling — 200 Members, Dubai entity, House scoping, AI alpha.
- Q6 (M16-18): Year-2 Mid — 350 Members, raise closes, House site, AI beta.
- Q7 (M19-21): Year-2 Institutionalisation — 500 Members, House construction, AI production prep.
- Q8 (M22-24): Year-2 End — 500-800 Members, House complete, AI production, Dubai cohort.

Appendix C: Glossary

- Member — a paying, vetted adult admitted to the brand.
- Trading Floor — the live, audio-first, Members-only room.
- Host — the experienced trader who narrates the Floor.
- Trading Credits — the in-product currency, bundled into the Annual fee.
- House of Traders — the eventual physical surface.
- Companion — the AI product (Q9-Q10 alpha, Q11-Q12 production).
- Discipline Test — the rule that every decision must pass the philosophy.
- Founding Members — the closed cohort of 50.
- Process Journal — the Member's 3-question weekly private practice.
- Brand Strategist's Veto — the binding discipline at every scale.
- Headcount Rule — a role opens only when $\text{gross profit} \times \text{Members} > \text{role cost} \times 1.5$.
- Decision Log — the canonical record of every material decision.
- "What we are NOT" — the philosophy's negations, applied per-surface.

Appendix D: Decision Register Summary

The Register contains 22 closed decisions (SDR-001 through SDR-022) and 10 open decisions (OPEN-001 through OPEN-010).

Closed (selected): SDR-002: Reject signal-selling. SDR-003: Lifestyle Brand positioning. SDR-007: Bootstrap posture. SDR-011: 13 v1 services. SDR-012: Single credit type. SDR-019: Headcount Rule. SDR-020: 6-dimension quality bar. SDR-021: Founding cohort cap. SDR-022: Founding-tier recognition.

Open: OPEN-006: Annual price. OPEN-007: Monthly price. OPEN-008: Founding cap (50). OPEN-009: Headcount safety factor. OPEN-010: Writing engine ownership.

Appendix E: Repository Map

30+ strategic documents across 11 active folders. See `docs/README.md` for the full hierarchy. Key: `00\_CONTEXT` → `01\_FOUNDATION` → `02\_BUSINESS` → `03\_PRODUCT` → `04\_BRAND` → `05\_MARKETING` → `06\_OPERATIONS` → `07\_EXECUTION` → `08\_INVESTOR`. Read in that order.

Appendix F: Reading Guide

New executive (7 days): (1) This Blueprint. (2) Master Context. (3) Vision-Mission-Values. (4) Brand Philosophy. (5) Operating Model. (6) Decision Register. (7) Strategy Office docs. (8) 6-Month Plan. (9) 24-Month Roadmap.

New investor: (1) This Blueprint. (2) Vision-Mission-Values. (3) Commercial Strategy. (4) Financial Model. (5) Decision Register.

New AI agent: (1) Master Context. (2) AI Writing Guidelines. (3) Glossary. (4) Project Status. (5) Decision Log. (6) Relevant specialist docs. (7) Relevant folder docs.

End of FX Teller Strategic Blueprint, Version 1.0. Prepared by the Executive Strategy Office. July 2026.
